

NEW!

STOP DUST FROM INTERFERING WITH THE GAME!

With Diamond Doctor® you'll have cleaner air for the players, the fans and the people living nearby!

After years of research and development, Midwest Industrial Supply, Inc., has developed a revolutionary new synthetic, organic dust control product designed specifically for use on ball fields. Midwest Industrial Supply, Inc. is the leader of quality innovations and solutions in dust control with over 25 years of experience.

-  **Clean Air For Players & Fans**
-  **100% Environmentally Safe**
-  **Excellent Climatic Tolerance**
-  **Non-Toxic And Biodegradable**
-  **Cost-Effective**
-  **Eliminates Watering**
-  **Colorless & Odorless**
-  **Treated Area Can Be Dragged**

Diamond Doctor® is the revolutionary way to manage dust control problems on ball fields.

BEFORE

AFTER

Dust can cause injuries on the ball field due to low visibility. It is a risk to participants and spectators that are susceptible to asthma and breathing problems. Dust can delay games due to frequent “dust storms”. Living close to a dusty ball field can be miserable, causing homeowners to frequently clean their porches, decks and necessitate the covering of their swimming pools.

Diamond Doctor® eliminates manpower and the water required to keep dust under control during an average season.

Contact us for more information on how **Diamond Doctor®** can help you develop the winning dust control management “game plan”.
